

Interior lists

Use Interior lists to create aesthetic and graphically striking interior design solutions. As a supplement to Dinesen floors or as an interior element in their own right. From architect-designed shelving units to sculptural walls and ceilings. On a white background, they provide a stringent expression; on a colored background the experience is completely different. The lists can be transformed with colored oil, or you can use them to build a unique wine rack, for example.

Please contact us if you would like other measurements.

In principle, Interior lists are without knots.
